

Lab 07 Tasks

Task 01

Create an array with 10 elements each of data type WORD. Move the elements of previously created array into a new array using stack.

Task 02

Write a program which displays the addition of three integers through a stack.

Task 03

Write a program having nested procedures are used to calculate the total sum of 2 arrays (each array having 5-elements). The sum of array-1 in 1st procedure and in 2nd procedure have sum of array-2. And the 3rd procedure added the results of both.

Task 04

Write a function that asks the user for a number n and prints the sum of the numbers 1 to n.
